Erin Tracy Designs

For combinations that work, check out designer Erin Tracy's well-executed line of jewellery that mixes elements from everyday life with the unexpected. Her creations are a blend of gold and silver, precious and semiprecious stones with concrete, rubber, wood, beach pebbles and acrylic thrown in. The results are dramatic, sleek sculptural art.

Tracy combines materials beautifully, creating pieces to suit lots of styles. Feeling a little zen? Then take a look at her Chanoyu collection inspired by Buddhist philosophies. Need a connection to the Earth? Then Garden Path should get you there. Have a need for the exotic? The timeless pieces

from Plume will captivate you. And just when you think you have her style pegged, you discover the luxurious **Wedding and Engagement rings**.

Not sure which one to buy? Then stack multiple pieces. If you are still stumped, set up a meeting at her Liberty Village location and have something custom designed.
